

Job Description: **Technologist**
Current Opening, posted February 11, 2010

Company: Tudor, Pickering, Holt & Co., LLC is an integrated energy investment and merchant banking boutique, providing high quality advice and services to institutional and corporate clients. Through the company's broker-dealer, Tudor, Pickering, Holt & Co. Securities, Inc., the company offers securities and investment banking services to the energy community.

The firm, headquartered in Houston, Texas, was formed through the 2007 combination of Tudor Capital and Pickering Energy Partners, Inc. and today has approximately 75 employees. Pickering Energy Partners was founded in 2004 and has quickly grown to be one of the most highly regarded equity research, sales and trading firms covering the upstream, midstream and oilfield service sectors. This expertise was complemented by the addition of Tudor's investment banking team, which provides focused advisory and financing services to its clients.

Position: This is a full time position located in our Houston Office. The incumbent in this role will be responsible for performing data gathering, organization, manipulation, and analysis, while working as part of a multidisciplinary team in evaluating and presenting our clients' oil and gas properties. This involves using sophisticated production and economic analysis software applications as well as advanced use of reserves, production, and leasing databases. Analysis will be organized and presented to the team, client and potential purchasers in a highly professional manner. The evaluations will be broad, supporting merger, acquisition and divestment analysis, including companies and assets spanning basins throughout the U.S.

Overall Responsibilities and Key Accountabilities:

- Extensive contact with client and potential purchasers
- Partner with clients' staff to gather and organize data for data rooms
- Assist in creating dataroom presentations
- Evaluate and interpret production data for specific basins/plays to determine trends/performance via PI/Dwights and/or HPDI
- Create maps displaying industry activity and trends for specific basins/plays
- Evaluate clients' assets via Aries based analyses
- Create and maintain a file system for managing reference data
- Assist in maintaining proprietary transaction and screening databases
- Evaluate and propose value added software and upgrades
- Proactive investigation of databases and new data sources

Background:

- Degree – Preferred, but not required
- At least 3 years of related industry experience, preferably with an exploration and production company, or third party engineering firm
- Intermediate skills in Excel, Word, Access, PowerPoint, ArcView, PI/Dwights, HPDI, Aries or another economic analysis product.
- Track record in acquisition and divestiture evaluations a plus
- Highly organized
- Ability to work in a fast paced, deadline oriented work environment
- Detail oriented with a strong work ethic
- Highly motivated and independent individual
- Excellent interpersonal, communication and organizational skills
- High integrity and credibility with clients and potential purchasers
- Ability to interact effectively in a multi disciplinary team and with clients

Compensation: A competitive compensation package including: base salary, performance based bonus, as well as a comprehensive benefit program will be provided.

Qualified candidates should submit a resume with a salary history to:
resumes@tudorpickering.com (NO CALLS).
